Product Overview

We are constantly striving to secure our assets and fill our lives with numerous joys. How far have we succeeded?

To help you overcome challenges in securing your assets today, Buckler Security Systems offers you to secure your assets 24/7 through its Multipurpose Security Systems for Residential and Commercial usage. Accurate functioning and NO FAKE ALARMS is just the beginning to what you are about to experience. It offers you with correct alerts at the time of intrusion, which effectively attempt to interrupt intrusion as most of the times you are unaware of the possible intrusion at your workplace or house. This Security System is powered by **Accurate Intrusion Prevention Technology** and is capable to provide you an uninterrupted battery backup of eight days. It's **Intrusion Call Alert function** promptly calls your Phone Number to alert you of likely Intrusion allowing you ample of time to connect to your near ones to mediate in your absence. Simultaneously, the **Intrusion Alarm System** and the **Intrusion Lights On Alert** activates so that the intruder is taken by surprise and vacates the site even before someone hears the alarm and comes in.

Your Security System should compliment your life and not just become a show piece.

Buckler Security Systems Components and their functions

1. **Main unit**

This ready to install unit is the main processing unit of your Security system and house the components of the Security Systems. Thus, enabling it to function actively.

2. **Hooter**

This is an external part of the Security System and functions while Intrusion Occurs. Its task is to blow out Siren at high volume to raise an Intrusion Alarm which is great for you as now you can promptly act during theft or intrusion and this can avoid unwanted situations at the site where our Security System is Installed.

3. **Sensor**

This is an external component of the Main unit of your security system and accurately monitors any attempts of thefts or intrusion and alerts the main unit which accurately raises an alarm and the inbuilt Dialer calls to inform the owner about the attempted theft or intrusion.

4. **Inbuilt Dialer**

This is also an important inbuilt component of your Security System and accurately functions by dialing the phone numbers enlisted in the memory of the dialer to inform the owner regarding any attempted intrusion of theft.

5. **Inbuilt Battery**

This part of the Security Systems is fitted into the Main unit of Your Security system and starts to function during power failure or power cuts. It provides the user with an 8day battery back and 15 day stand-by operation for the Security System.

Key Features of Buckler Security System

Invisible Mode

With an in-built mike you can now listen to what other people talk in your absence. As this will also alert you even before something goes wrong at your place.

Call Alert

This feature functions via-sim card provided by the customer and is *Solely DEPENDANT on Your GSM NETWORK SERVICE Provider* and its sole purpose is to Call on Mobile/Land Line Numbers Stored in the In built Dialer. This **CALL ALERT** is promptly executed at the time of an attempted intrusion. Therefore, allowing you ample of time to safeguard your assets as you can call someone nearest to your location where the intrusion is taking place.

Shock Proof

The in-built components are carrying electric charge that will not harm the user however you are warned not to man handle the component so as to avoid any damage to the product or self.

8days Battery Backup

Your Security systems is built to accurately monitor and function even during power failure or power cuts and this enables you to remain secure 24/7 for 8days with the battery back up. Thus, allowing you a complete peace of mind even during major power breakdowns which normally don't occur however with the battery back up your stress levels are reduced.

Intrusion Alarm Alert

Your Security System is powered by (A.I.P.) Accurate Intrusion Prevention Technology which enables the Security System to Accurately and **Promptly Blow out the Hooter** to Raise an Alarm at the time of Attempted Intrusion.

Intrusion Lights on Alert

Your Buckler Security System is also capable to switch on lights even before an intrusion takes place. Now, this action functions without delay during the time of intrusion leaving the intruder with the fear of being confronted.
